➤ Tee Selection Key

- **YELLOW:** Shortest tees, great for juniors and ladies new to the game
- **RED:** Traditional women's tee, also a good option for some seniors
- **WHITE:** Standard tee for most adult men, call it our member's tee
- **BLUE:** Expert tees for the longest hitters

GAME OPTIONS

STROKE

Play up to 6 people at a time and rank will be decided based on the final score.

ALTERNATE SHOT

Play in teams of 2 or 3. Teammates alternate shots on the same ball until the hole is completed.

SCRAMBLE

Teams of 2, 3 or 4 each hit a shot. The best shot is selected, the players then each hit a shot from that position. Play is continued until the ball is holed.

SKINS

Stroke play but the player with the lowest score wins the "skin" for that hole.

PAR 3 GAME.

Turn any course into a Par 3 course and rank is decided on the final score.

BEST BALL

Teams play their individual ball for the duration of the game. The best score of the team on each hole is the team's score.

KNOW YOUR NUMBERS

DISTANCE: Total distance the ball traveled.

CARRY: The distance the ball traveled in the air before it landed.

BALL SPEED: The speed the ball traveled. This is created by club speed and impact. The faster the club speed and centeredness of the hit are the two main determining factors that will dictate ball speed.

BALL DIRECTION: This is the angle between the target line and ball path at launch. If you see "0" then your ball is traveling directly along the target line at launch.

LAUNCH ANGLE: The angle between the ball path and ground at launch. Swing speed and club selection will impact the launch angle as well as the angle of attack. For example, the average driver launch angle on the PGA Tour is 11.2 degrees.

BACK SPIN: The rate of backwards spin rotation on the ball immediately after impact. Typically, the more lofted the club, the more spin generated.

SIDE SPIN: The rate of side spin on the ball. Depending on the amount of degree will dictate a draw or fade.

IMPACT ANGLE: This is the direction the club is heading at impact. positive numbers indicate "in-to-out" for righty's but negative numbers indicate "in-to-out" for lefty's.

PEAK VERT: Maximum height the ball reached during its flight.

PEAK HORIZ: This measures how far the ball traveled before it reached its maximum height.

SEP. DIST: How far from the target line the shot finished.

HEAD SPEED: The rate of speed of your club head at impact.

SMASH FACTOR: The ratio between club speed and ball speed. It is calculated by dividing ball speed by club head speed. Smash factor is an indicator of how efficiently energy is transferred from the club head to the ball. There is an optimal smash factor for each club, ranging from a driver at 1.50 to a pitching wedge at 1.25.
