# TEE SELECTION KEY

- YELLOW**  
Shortest tees, great for juniors and ladies new to the game
- RED**  
Traditional women's tee, also a good option for some seniors
- WHITE**  
Standard tee for most adult men
- BLUE**  
Expert tees for the longest hitters and skilled players

## GAME OPTIONS

### STROKE

Most common format. Play up to 6 people at a time and rank will be determined by the final score.

### PAR 3

Same as stroke play, but where each hole on the select course is set up to play as a par 3.

### ALTERNATE SHOT

Golfers play as partners, using only one ball, and taking turns (i.e. alternating) in hitting shots.

### SKINS

Players compete for points a.k.a. "skins" by getting the single lowest score on each hole.

### SCRAMBLE

Each player hits a shot, the team chooses the best one, and then everyone hits from there.

### BEST BALL

Players on a team play their own ball. The lowest score counts as the team's score for the hole.

## KNOW YOUR NUMBERS

**DISTANCE:** Total distance the ball traveled.

**CARRY:** The distance the ball traveled in the air before it landed.

**BALL SPEED:** The speed the ball traveled. This is created by club speed and impact. The faster the club speed and centeredness of the hit are the two main determining factors that will dictate ball speed.

**BALL DIR:** This is the angle between the target line and ball path at launch. If you see "0" then your ball is traveling directly along the target line at launch.

**LAUNCH ANG:** The angle between the ball path and ground at launch. Swing speed and club selection will impact the launch angle as well as the angle of attack. For example, the average driver launch angle on the PGA Tour is 11.2 degrees.

**BACKSPIN:** The rate of backwards spin rotation on the ball immediately after impact. Spin rate is one of the least appreciated numbers in windy conditions. Typically, the more lofted the club, the more spin generated. This is why when playing in the wind we often club up.

**SIDE SPIN:** The rate of side spin on the ball. Depending on the amount of degrees will dictate a draw or fade.

**SWING PATH:** This is the direction the club is heading at impact. Positive numbers indicate "in-to-out" for right hand golfers but negative numbers indicate "in-to-out" for left handers.

**PEAK VERT:** Maximum height the ball reached during its flight.

**SEP DIST:** How far from the center line the shot ended up.

**PEAK HOR:** This measures how far the ball traveled before it reached its maximum height.

**HEAD SPEED:** The rate of your club head speed at impact. More club speed means more potential distance.

**SMASH FAC:** The ratio between club speed and ball speed – literally ball speed divided by club speed. Smash factor is an indicator of how efficiently energy is transferred from the club head to the ball. There is an optimal smash factor for each club, ranging from a driver at 1.50 to a pitching wedge at 1.25.
